

## Product care for Lammhults products

Our furniture is built to last. Care for your furniture in line with these instructions, preferably using ecolabelled cleaning products.

### Cleaning and maintenance of melamine and high pressure laminate

#### (Lightly soiled - Daily cleaning)

- Wet a cloth in water containing mild all-purpose cleaner, soap or washing-up liquid.
- Wring out the cloth and wipe the surface.
- Dry with a clean dry cloth.

#### (Heavily soiled - Thorough cleaning)

- Wipe of any loose dirt.
- Wet a cloth in water containing mild all-purpose cleaner. Wring out the cloth.
- Dab the damp cloth in the detergent and wipe to dissolve all the dirt. On satin, interior and other longitudinal structured surfaces, wipe along the the grain.
- Wet a clean cloth in clean water, ideally with some window cleaner and wipe again.
- Wipe dry with a clean cloth.

For heavily soiled structured surfaces, clean with a soft brush.

**NB:** Do not use scouring agents or other detergents which contain abrasives.

#### Removing pen marks

- Use an ecolabelled stain and graffiti remover to remove felt tip and marker pen.
- Use a pencil eraser to remove pencil marks.

### Cleaning and maintenance of furniture treated with water-based lacquer or stain

Your furniture has been surface treated with water-based lacquer or stain. To maintain the original finish, the surface must be cleaned regularly.

- Use a slightly damp cloth and a few drops of very mild cleaning detergent. Do not leave liquid on the surface.
- Wipe with water and dry with a soft cloth
- Dry with a clean dry cloth.

**NB:** Do not use scouring agents or other detergents which contain abrasives. Also avoid detergents that contain ammonia.

### Cleaning and maintenance of furniture such as table tops treated with acid-resistant lacquer

Your furniture has been surface treated with water-based lacquer or stain. To maintain the original finish, the surface must be cleaned regularly.

- Use a damp cloth and a mild cleaning detergent. Do not leave liquid on the surface.
- Wipe with water and dry with a soft cloth.

**NB:** Do not use scouring agents or other detergents which contain abrasives. Also avoid detergents that contain ammonia.

## Cleaning and maintenance of plastic - backs, seats and seat shells

### (Lightly soiled - Daily cleaning)

- Wet a cloth in water containing mild all-purpose cleaner, soap or washing-up liquid.
- Wring out the cloth and wipe the surface.
- Dry with a clean dry cloth.

### (Heavily soiled - Thorough cleaning)

- Wipe off any loose dirt.
- Wet a cloth in water containing mild all-purpose cleaner, wring.
- Dab the damp cloth in mild detergent and wipe to dissolve the dirt.
- Wet a clean cloth in clean water, ideally with some window cleaner and wipe again.
- Wipe dry with a clean cloth.

### Removing pen marks

- Use an ecolabelled stain and graffiti remover to remove felt tip and marker pen.
- Use a pencil eraser to remove pencil marks.

## Cleaning and maintenance of chromium plated, polished or powder-coated surfaces

### (Regular care)

- Dampen a clean cloth with window cleaner.
- Wipe the surface.
- Dry with a clean dry cloth.

## Cleaning and maintenance of Linoleum

### (During and after assembly)

- Immediately remove any marks and fingerprints resulting from the assembling process.
- Use a damp cloth and a PH-neutral cleaning detergent.
- Wipe the surface dry after cleaning.

### (Regular care)

- Moisten with a damp cloth. For light soiling use a soap-based cleaner diluted with water, washing-up liquid, lino soap or a PH-neutral cleaner. Immediately remove spillages and marks.

Ideally use a coaster for glasses, cups etc. where spillage can occur. For tough stains like ink and pencil, use a clean cloth and a neutral cleaning detergent and gently rub the mark.

**NB:** Do not use alkaline (basic) cleaning detergents.

For heavier stains and very thin scratches, use a clean cloth and turpentine, then dry with linseed oil soap. We recommend to regularly maintain the surface with Forbo's own linseed oil soap for linoleum, it gives a saturated surface.

## Cleaning and maintenance of textile/leather

Textiles and leather are chosen by the customer and vary in material, quality and so on. Therefore, please check care instructions with manufacturer of the textile/leather in question.
